# Study Skills

## 27 Years of Exceptional Workshops

Ace Tutoring has the most experienced tutors with a profound understanding of the transition from Primary to High School. This workshop deals with the expectations of High School and how to manage and organise an increased workload. It addresses the stress of transitioning and provides students with a tool belt of knowledge and skills.

These courses are not lectures; they engage students, building confidence and developing the ability to organise new study systems. A significant portion of the course is devoted to time management. Students will develop a bespoke timetable that incorporates academic work, sport and family/social life. Tutors also have a wealth of tips, tricks and strategies to empower students to better handle the rigours of High School life.

## Outstanding Results

- Parents reported an overall increase in their child's confidence in organising their time and priorities
- Students were more willing to complete homework tasks without procrastination
- 94% of parents surveyed between 4-6 weeks after the workshop were extremely happy with their child's positive shift in motivation, attitude and workload

## We're Different

Our tutors excel in helping everyone understand concepts they thought they'd never grasp. We employ a workshop configuration to facilitate students operating at different levels, whilst maintaining equitable attention.

There is a solid interview process to become an Ace Tutoring team member. Only the most successful and proven tutors are handpicked to deliver our workshops, ensuring outstanding delivery. 100% of our anonymous student feedback confirms our tutors are some of Perth's best in motivating students and increasing marks quickly!
