# Study Skills

## 27 Years of Exceptional Courses

Ace Tutoring has the most experienced tutors with a profound understanding of their specialist subjects. They construct mock exams questions based on those that are most commonly found in real exams each year. They work through complex questions with students, breaking them down into smaller, simpler steps. This teaches students to deal with problems efficiently, alleviating the stress of the examination environment by developing effective strategies.

These courses are not just lectures; they engage students, building the confidence to acquire knowledge and skills that they can demonstrate through examination. A significant portion of the course is devoted to time management. Tutors also have a wealth of tips, tricks and strategies to empower students to complete exams in a manner examiners are looking for. At the conclusion, students will create a bespoke Study Plan, allowing them to study effectively after the course.

## Outstanding Results

- Follow up surveys of course attendees found an increase in student school marks from 15-40% in one or more subjects
- 81% of students were still using their course timetable after 6 weeks
- 70% of students were still using both their Time Management Tools; a timetable and logging page. The latter was either kept in their laptop, in an exercise book, or on an app specifically designed for keeping track of time spent on each subject daily
- 96% of parents surveyed between 4-6 weeks after the Course were extremely happy with the positive shift in motivation, attitude and workload their child was now displaying

## We're Different

We utilise School Term Outlines, tailoring our Revision Courses to match the syllabus and focusing on the three weakest areas where students have performed poorly. Our tutors excel in helping everyone understand concepts they thought they'd never grasp. We employ a workshop configuration to move stronger students onto more difficult exam questions whilst assisting other students, maintaining equitable attention.

There is a solid interview process to become an Ace Tutoring team member. Only the most successful and proven tutors are handpicked to deliver our courses, ensuring outstanding delivery. Anonymous attendee feedback confirms our tutors are some of Perth's best in motivating students and increasing marks quickly!
